Prepping for the Future

Atlanta, Ga. – Jan 2006–

Technology Uplift realizes that education is an important step on the path to success. In light of our mission and goals, Technology Uplift established a SAT Preparation Course, which operates in conjunction with the Youth Mentoring Program. It is the hope of Technology Uplift to have 80% of the high school level Technology Uplift program youth participate in SAT/ACT exam preparation from August to

October and complete at least one SAT/ACT exam during the academic year. Higher scores on these college entrance exams mean gaining access to advanced educational degrees and increased economic independence for the future. With only 3% of students from the lowest socioeconomic levels gaining acceptance in the elite colleges of the United States, members of Technology Uplift realize the importance of making sure

that all students have access to SAT preparation. The SAT exam has changed considerably and several students are finding themselves unprepared for the changes. Members of Technology Uplift have decided that providing our youth with the correct tools allows every child to build a bridge to his or her desired future .

College Preparation: Researching Funding Possibilities

Atlanta, Ga. – Mar 2005–

Technology Uplift continues to encourage community members to seek economic advancement through academic achievement. Community members participating in the Uplift Youth Mentoring Program and the Uplift Career Development Program will receive guidance in the area of obtaining

grants and scholarships that can fund their two and four year college or university aspirations. Each year there are millions of dollars in scholarship and grant funds left unclaimed. There are several scholarships and grants that are not known by the very students that these funds were created to assist. The goal of Technology Uplift is to

provide interested individuals with vital grant and scholarship information along with the guidance necessary to successfully complete the application process associated with each financial reward. Technology Uplift looks forward to assisting individuals in the pursuit of their college dreams.
